## TIER 4 PREMIUM DATA CENTER IN MUNICH

- Portus Data Centers Munich delivers premium carrier-neutral colocation designed for enterprises requiring uncompromising performance, resilience, and scalability.
- Strategically located in one of Europe's leading digital hubs, the facility combines low-latency connectivity with highly available infrastructure, offering 1.5MW capacity.
- Engineered for mission-critical workloads, the data center features fully redundant power and network architecture, 72-hour backup autonomy, and highly efficient cooling built to support demanding high-density environments.
- Advanced physical security, sophisticated fire suppression systems, and diverse carrier connectivity provide the protection, uptime, and operational continuity expected from premium colocation environments.
- Combining performance, security, and future-ready infrastructure, Portus Data Centers Munich offers a premium ecosystem built to support business-critical operations from day one.

## MUC1 KEY FACTS

<b>Power</b>	1.5MW of critical IT-Load
	1,000m2 of white space over 2 floors
	3 stand-by generators and redundant power connection to the grid
	Use of 100% renewable energy
<b>Energy Efficiency</b>	EnEfG energy efficiency compliant, designed for a PUE of 1.3 or lower
<b>Design</b>	EN50600 VK4 delivers the highest levels of security and resilience for mission-critical environments
	Cooling infrastructure engineered for a wide range of power densities
	Convenient access from the loading dock to the lift, through staging and storage spaces, and into the data hall
<b>Location</b>	15km from Munich city center, easily accessible by road, rail and air
<b>Services</b>	Colocation, from a single rack to private cages, to full data halls
<b>Security</b>	24x7 On-Site Security, CCTV, Biometric Scanners, Key Card Access, Perimeter Fencing, Mantrap Security
<b>Amenities</b>	Customer space with lounge area
	Mobile work platforms with computer displays
	Customer parking and bike stations
<b>Certificates</b>	Certifications: ISO27001 & EN50600 VK4
<b>Connectivity</b>	Carrier-neutral, redundant Meet-Me Room (MMR)
	1&1 Versatel, Arelion, Core-Backbone, Colt, DE-CIX, Megaport Internet Exchange, M-net, NGN, Deutsche Telekom
