2 floors

AI Native

NEW TIER 3 DATA CENTER IN PRIME LOCATION IN MUNICH.

- Construction of the new carrier-neutral data center has already started on the Munich campus and initial capacity will be delivered in early 2027.
- MUC2 will be fully EnEfG (German Energy Efficiency law) compliant and will cater for workloads ranging from normal power densities all the way to AI and HPC workloads, including ultra-high density using liquid cooling.
- As such, Portus has developed an AI Native reference design that makes the data center fully future-proof. Providing industry-leading energy efficiencies of PUE 1.2 or lower, it will use 100% renewably sourced power and the latest cooling technologies.
- Located in Europe's innovation capital, Portus Munich combines performance, sustainability, and cost-efficiency, supported by hands-on expertise and an experienced team.
- Join a future-ready ecosystem shaped around your business from day one.

MUC2 KEY FACTS

Power	5.5MW of critical IT-Load
	2,200m2 of white space over 2 floors
	4 stand-by generators and redundant power connection to the grid
	Use of 100% renewable energy
Energy Efficiency	EnEfG energy efficiency compliant, designed for a PUE of 1.2 or lower
Design	Designed to Tier 3 level of redundancy and uptime
	Hybrid cooling concept able to manage classic rack densities and higher densities for AI and HPC
	Convenient access from the loading dock to the lift, through staging and storage spaces, and into the data hall
Location	15km from Munich city center, easily accessible by road, rail and air
Services	Colocation, from a single rack to private cages, to full data halls
Security	24x7 On-Site Security, CCTV, Biometric Scanners, Key Card Access, Perimeter Fencing, Mantrap Security
Amenities	Customer space with lounge area
	Mobile work platforms with computer displays
	Customer parking and bike stations
Connectivity	Carrier-neutral, redundant Meet-Me Room (MMR)
	The following carriers are available on-site already and more to come soon: Colt, M-net, NGN, 1&1 Versatel, Telekom, Megaport Internet Exchange
